# **Rate of Rise Heat Detector**

## FIRE ALARM SYSTEMS

#### **□** Features

- 1. With dual LED, easy to observe state of detector.
- 2. With large metal surface to expose the air to sense the temperature.
- 3. Easy install and replace.

## Specifications

| Model No            | HC - 306A        | Overall structure |                             |
|---------------------|------------------|-------------------|-----------------------------|
| Rated voltage       | DC 12V-30V (24V) | Material          | Fire-resisting ABS material |
| Standby current     | 0 μΑ             | Joint contact     | Copper (zinc-plated)        |
| Alarm current       | 60mA             | Color             | Ivory                       |
| Working temperature | -15~50°C         |                   |                             |
| Working humidity    | 0~95% RH         |                   |                             |
| Size                | 103mm x 43mm     |                   |                             |
| Weight              | 150g             |                   |                             |
|                     |                  |                   |                             |
